

# Developmental norms: Teeth - Birth to 30 months

## Birth

Babies are born with all their teeth. You can't see them as they are hidden in their gums.

## 5-7 Months old

At around 5-7 months the bottom central incisors (bottom front teeth) start to come through.

## 6-8 Months old

At around 6-8 months the top central incisors (top front teeth) start to appear.

## 9-11 Months old

At around 9-11 months the top lateral incisors (either side of the top front teeth) appear.

## 10-12 Months

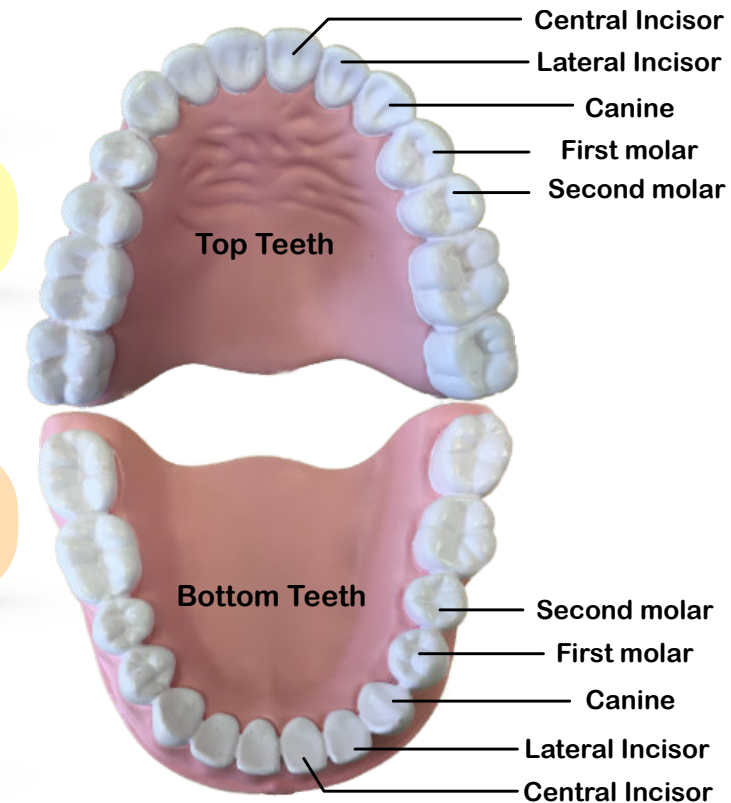

At around 10-12 months the bottom lateral incisors (either side of the bottom front teeth) start to appear.

## 12-16 Months old

At around 12-16 months the first molars (back teeth) come through.

## 16-20 Months old

At around 16-20 months the canines (towards the back of the mouth) come through.

## 20-30 Months old

At around 20-30 months the second molars come through.
